

Studentapp host using jenkins pipeline with node.

Pipeline:-

```
pipeline{
  agent{
    label 'agent3'
  }
  stages{
    stage("Cloning from git repository"){
      steps{
        sh'''
        sudo git clone 'https://github.com/PratikBorge/Webapps.git'
        '''
      }
    }
    stage("Downloading apoache tomcat"){
      steps{
        sh'''
        sudo wget
https://dlcdn.apache.org/tomcat/tomcat-8/v8.5.99/bin/apache-tomcat-8.5.99.tar.gz
        sudo tar -xzvf apache-tomcat-8.5.99.tar.gz
        '''
      }
    }
    stage("Moving files"){
      steps{
        sh'''
        sudo mv /home/ubuntu/workspace/Tom/Webapps/student.war
/home/ubuntu/workspace/Tom/apache-tomcat-8.5.99/webapps
        sudo mv /home/ubuntu/workspace/Tom/Webapps/mysql-connector.jar
/home/ubuntu/workspace/Tom/apache-tomcat-8.5.99/lib
        sudo -s /home/ubuntu/workspace/Tom/apache-tomcat-8.5.99/bin/catalina.sh start
        '''
      }
    }
  }
}
```
