

### Web page host using jenkins pipeline with node.

#### Pipeline:-

```
pipeline{
  agent{
    label 'agent3'
  }
  stages{
    stage("Installing
    apache2"){ steps{
      sh'''
      sudo apt install apache2 -y
      sudo systemctl start apache2
      '''
    }
  }
  stage("Creating index.html
  file"){ steps{
    sh'''
    sudo echo "This is my webpage" >> index.html
    '''
  }
}
stage("removing the default index.html
file"){ steps{
  sh'''
  sudo rm -rf /var/www/html/*
  '''
}
}
stage("moving our created
index.html"){ steps{
  sh'''
  sudo mv /home/ubuntu/workspace/Tom/index.html /var/www/html
  sudo systemctl restart apache2
  '''
}
}
}
```
