Pratik Chandrakant Borge

HTTPD webpage host using Docker

Step 1:- Create an EC2 instance Ports:22, 80

Step 2:- Connect to EC2 instance

Step 3:- Install Docker Engine latest version https://docs.docker.com/engine/install/ubuntu/ (for ubuntu)

Step 4:- Create httpd container

docker run -d -p 80:80 httpd docker ps (to check running container) docker cp index.html cont.id:/usr/local/apache2/htdocks/html/index.html

Make sure you have index.html

Index.html=

<h1>HELLO WORLD!</h1>
welcome to the world of devops

Paste IP in your browser and you will see the message from html file.
