Studentapp host using jenkins pipeline with node.
Pipeline:-

```
pipeline{
    agent{
        label 'agent3'
    }
    stages{
        stage("Cloning from git
            repository"){ steps{
                sh'''
                sudo git clone 'https://github.com/PratikBorge/Webapps.git'
                '''
            }
        }
        stage("Downloading apoache
            tomcat"){ steps{
                sh'''
                sudo wget
https://dlcdn.apache.org/tomcat/tomcat-8/v8.5.99/bin/apache-tomcat-8.5.99.tar.gz
                sudo tar -xzvf apache-tomcat-8.5.99.tar.gz
                '''
            }
        }
        stage("Moving
            files"){ steps{
                sh'''
                sudo mv /home/ubuntu/workspace/Tom/Webapps/student.war
/home/ubuntu/workspace/Tom/apache-tomcat-8.5.99/webapps
                sudo mv /home/ubuntu/workspace/Tom/Webapps/mysql-connector.jar
/home/ubuntu/workspace/Tom/apache-tomcat-8.5.99/lib
                sudo -s /home/ubuntu/workspace/Tom/apache-tomcat-8.5.99/bin/catalina.sh start
                '''
            }
        }
    }
}
```
